ENJOY A SUPERIOR CUSTOMER EXPERIENCE

SYSTEM MANAGEMENT BENEFITS

Content Controlled Centrally

All content can be created and shared or managed from a single point. PIXIE IPTV solution transforms your current hospitality displays into centrally controlled communication hubs to drive your desired content effectively

Enhanced Customer Engagement

An IPTV hospitality solution allows your hotel content management staff to upload content to give your guests the personalized entertainment and communication that distinguishes your brand

Customer Centric Delivery

We provide integration services for integrating our products with your systems and other products along with setting up and installing other 3rd party services and/or software.

Pixie IPTV hospitality solution is designed to deliver infotainment services and features to hotel guests. We enable hotels to distribute high-quality free view and subscription in satellite or terrestrial television channels on-demand, to any desired location across your site including hotel lobbies, reception rooms, guestrooms, bars, dining areas, conferencing facilities and communal spaces.

WE HAVE THE ABILITY TO SATISFY YOUR CUSTOMER!

PIXIE IPTV gives your guests the best in-room entertainment and interactive information at an affordable price. We deliver IPTV systems along with full technical support and customization giving hotels the branding capability to create a unique customer experience throughout their facilities.
